Data is collected from companies in the managed funds market covering funds under management, gross inflows and outflows, unit prices and investment return rates. Gross Inflows represents an indication of new business sales. This data is thoroughly checked and queries are raised with the providers if any of the data is significantly different from trends or compared to other companies. Where inflow or outflow data is unavailable, we make estimates based on market behaviour from similar investments in compatible markets. This estimation procedure, coupled with our rigorous direct data collection, enables us to prepare high quality, reasonable and comprehensive data for every Manager.
