Analysis of Wholesale Funds December 2021

12 April 2022

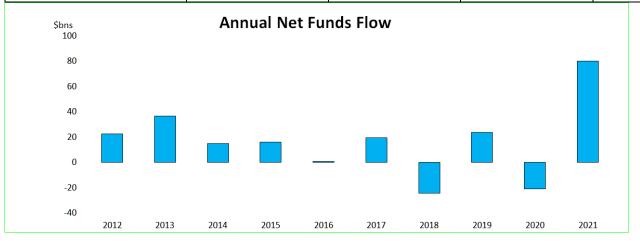

Wholesale Funds Jump another \$64.8bn during the December 2021 Quarter

Wholesale Funds increased by 4.4% in the December quarter to \$1,528.0bn to finish 2021 up more than a quarter, or 25.6%, mainly due to a combination of strong investment earnings and positive net cash-flow. In addition, in the past year large triple digit percentage increases were reported by AMP (240.6%) as a result of its inclusion of previously internally invested funds after it demerged AMP Capital, and Insignia Financial (279.0%), the rebranded IOOF, due to its MLC takeover. State Street (61.9%), UBS (22.2%), Victorian Funds (18.7%), Challenger (17.4%) and BlackRock (14.2%) were also up significantly however Vanguard (-23.1%) reported a fall after exiting their SMA business.

Reported Gross Wholesale Inflows in 2021 totalled \$471.7bn which was up by almost two thirds or 66.5% on the 2020 total. Year on year AMP, State Street, UBS, Insignia and MFS all posted some very significant Inflow increases while those of both Challenger and BlackRock remained little changed and Vanguard reported a decrease.

Data is collected from companies in the managed funds market covering funds under management, gross inflows and outflows, unit prices and investment return rates. Gross Inflows represents an indication of new business sales. This data is thoroughly checked and queries are raised with the providers if any of the data is significantly different from trends or compared to other companies. Where FUM or Flow data is unavailable directly, figures may be used from publicly available sources such as Annual Reports or estimated based on market behaviour from similar investments in compatible markets. This estimation procedure, coupled with our rigorous direct data collection, enables us to prepare high quality, reasonable and comprehensive data for every Manager.
