About the Media Release

The Media Release is provided by Plan For Life, Actuaries and Researchers. This Media Release is designed to give managing directors, marketing managers and other senior managers a timely and comprehensive overview of the performance of individual companies and the overall market.

Data Collection and Estimation Techniques

Data is collected from companies in the managed funds market covering funds under management, gross inflows, gross outflows, net inflows unit prices and investment return rates. Gross Inflows represents an indication of new business sales. Data is thoroughly checked and queries are raised with data providers if data is significantly different from trends or compared to other companies. Where inflow or outflow data is unavailable, we make estimates based on market behaviour from similar investments in compatible markets. When companies provide actual inflow and outflow data these replace estimates. This estimation procedure, coupled with our rigorous direct data collection, enables us to prepare high quality, reasonable and comprehensive data for every Manager.
